**SUPPLEMENTARY INFORMATION:** Under the direction of Homeland Security

Presidential Directive-7 (2003), Presidential Policy Directive -21, and the National Infrastructure Protection Plan (NIPP 2013); NPPD/IP has developed the IP Gateway, a centrally managed repository of infrastructure capabilities allowing the Critical Infrastructure (CI) community to work in conjunction with each other toward the same goals. This collection encompasses three IP Gateway functions: General User Registration, Chemical Security Awareness Training Registration, and a User Satisfaction Survey. Upon requesting access to the IP Gateway, the multi-screen registration form requests the user's full name, work address, contact information Protected Critical Infrastructure (PCII) training status, citizenship status, supervisor and sponsor information, and additional questions related to the user's role in using the information. Upon registering for Chemical Security Awareness Training, a collection form requests the trainee's desired username, password, proposed secret question & response, and company type, size, name, & location. For the voluntary User Satisfaction Survey, the collection form requests information regarding the user's job duties, types of information sought via the IP Gateway, access patterns, and system usability ratings. The survey information will be used to evaluate program and training performance as well as to gather any additional requirements for future IP Gateway system updates.
